

**Globalstar Value Proposition:**

Recent tests of Globalstar service using the Optimum Satellite Availability Tool

[\(http://www.globalstarusa.com/en/optimum\\_tool/\)](http://www.globalstarusa.com/en/optimum_tool/) have proven to be quite successful. GMPCS has tested Globalstar service utilizing the Optimizer and found the tool to be very accurate. The calls placed during the windows predicted by the optimizer are high quality with at least a 3-4 minute duration on a regular basis. If you are OK with utilizing the Optimizer tool with a high probability that you will be able to get a call through during one of the windows (figure there will be at least 2-4 windows each hour), then Globalstar will be the best value for you. Globalstar is also scheduled to begin launching their second generation satellite constellation this fall.

**To help you decide that Globalstar might be the best option for you. GMPCS has arranged for you to test drive a Globalstar phone for 10 days at no cost to you.**

**Option 1.** If you already have a Globalstar phone and your service is currently inactive, you can contact GMPCS Customer Support at +1-954-973-3100. They will be able to arrange to activate your phone for a ten day test drive at no cost to you. Use your phone, utilizing the Optimum Satellite Availability Tool, during the test drive period. At the end of the Test Drive, you can contact GMPCS to activate your phone on the Globalstar 2009 Value Plan (\$34.95 monthly fee for unlimited calls in your home area – Canada, US including Alaska and the Caribbean) – or – simply put your phone back on the shelf and GMPCS will deactivate your test drive.

**For Option 1 please provide your Globalstar ESN number located under the Battery: ESN# \_\_\_\_\_**

**Option 2.** If you do not currently own a Globalstar Phone, you can contact GMPCS Customer Support at +1-954-973-3100 and arrange to borrow a phone for your free Test Drive. GMPCS will send you a Globalstar Phone activated on the test drive plan and you will have ten days to evaluate Globalstar service. At the end of the Test Drive you will need to return the loaner phone. At that time you will have the option to buy a new Globalstar GSP 1600 or GSP 1700 handset and enroll in the Globalstar 2009 Value Plan with unlimited airtime for \$34.95 per month. You will be required to pay for shipping of your loaner phone from and back to GMPCS and your credit card will be charged with a \$300 security hold until the phone is returned, but that is all you have to do to find out for yourself if Globalstar is the right answer for you.
